My chiropractor, Dr. Alexander, has been in practice for over 20 years and has helped literally thousands of people with these complaints. Because he believes strongly in natural, alternative health care he has expanded his knowledge and practice to include several very successful methods of relieving pain and identifying and alleviating allergies without the use of drugs or shots.

He knows that many people are new to the concepts of alternative health care and don't fully understand what chiropractors actually do. Often they have many questions about whether seeing a chiropractor will be helpful for them. That's why Dr. Alexander offers a **FREE, no obligation consultation** to anyone who wants to find out more about their condition, understand what alternative treatment choices there are and how, or even if, he can help.

Chiropractic and alternative health care is not always the right treatment for everyone. If he finds that your situation does not qualify for the services he offers, he will refer you to an appropriate practitioner.

Your initial consultation with Dr. Alexander is always totally **FREE and without any obligation**. If your condition does qualify and you choose to take your visit to the next step, use this letter as a coupon for an initial allergy or chiropractic exam, and if needed, (2) x-rays for only \$49. (The normal initial exam fee is \$155.)

I know that you will enjoy meeting and talking to Dr. Alexander and he will do his very best to answer all your questions. **Call him TODAY at 678-407-8230** to schedule your **FREE, no obligation consultation**.

Wishing you the best in health,
